WHY CHOOSE MONO-MATERIAL?

Mono-material packaging is an ideal eco-friendly packaging choice:

- Contains only one type of material (i.e. mono)
- More easily recycled in curbside recycling bins
- Consumers do not need to disassemble the product before recycling.
- Available in 100% PP, PE or PET

We have a growing selection of recyclable mono-material packaging available in most any product category from our In-Mold Label (IML) mono PP tubes to mono PE or PET bottles, jars and sticks.

We also offer the option to add various % of PCR (post consumer recycled) material to most mono material packaging options, boosting your environmentally friendly credentials and helping to lower your carbon footprint.
