Recyclable Packaging Solutions

Meeting PPWR Guidelines

The Brains Behind The Beauty

A decorative image on the left side of the page showing a green plant with leaves and a small white flower against a blue sky with white clouds. The plant is in the foreground, and its shadow is cast onto a light-colored, textured surface below it.

What is PPWR?

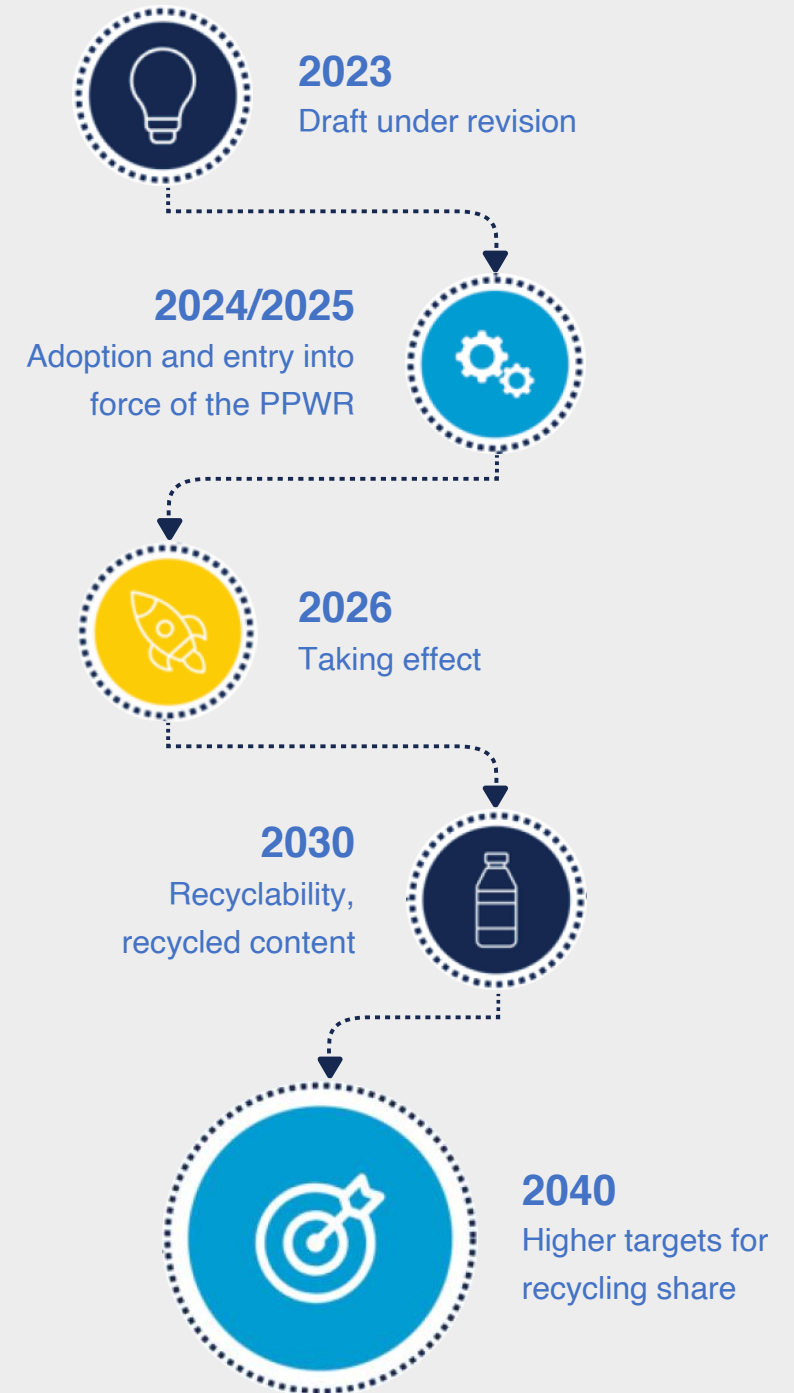

The Packaging and Packaging Waste Regulation (PPWR)

is a European Union (EU) law that sets rules for package design requirements, production, labeling, reuse and recycling.

Main goals of PPWR:

- Recyclable by design
- Reduce packaging waste
- Promote reusable and refillable packaging
- Mandatory recycled content (post-consumer recycled)
- Limit substances of concern such as heavy metals and forever chemicals
- Support circular economy

**Recyclability capabilities may vary by location.*

Ready. Set. Align with PPWR.

Designed to support PPWR guidelines and a more circular future, ICONS America offers a broad range of solutions, including mono-material tubes, bottles, jars, and sticks options. We also offer the option to add various % of post-consumer recycled (PCR) content to mono-material packaging.

Mono-material packaging is an ideal eco-friendly packaging choice:

- Contains only one type of material (i.e. mono)
- More easily recycled in curbside recycling bins
- Consumers do not need to disassemble the product before recycling.
- Available in 100% PP, PE or PET

Please contact your Business Development Manager for more information.

In-Mold Label (IML) Tube

ICONS America's 35mmD, 40mmD and 50mmD tubes are lightweight, sustainable, and offer the perfect balance between full-size and travel-ready convenience for beauty, skincare, and hair care formulations, with fill capacities ranging from 40ml to 250ml.

- Made-in-USA with USA resins and labels
- Recyclable mono-material PP tube and cap
- Available with PCR
